

Portable CO Monitoring

Grade-D Breathing Air Filtration

Portable Carbon Monoxide (CO) Monitors

Portable CO
Monitor
CO91-14LAC

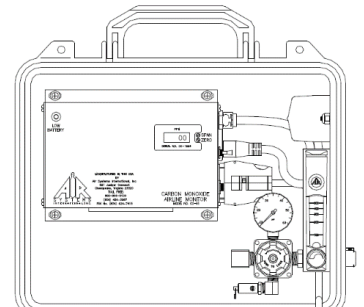

A portable airline monitor connects easily to a breathing air filtration source or ambient air pumps and monitors the air for CO content. An audible alarm (95 dBA) and light will activate when the CO level exceeds 10 ppm (5 ppm Canadian). Used in the closed and upright position, an external alarm and lights signal the user if there are dangerous CO levels.

CO91-14LAC

BBK-20

Also available as -- Intrinsically Safe
