

- All steel frame and cabinet construction with structural steel base
- Cabinet liner in areas of direct shot impingement
- Direct drive 3600 RPM impeller motor
- Balanced impeller wheel
- Wheel well is lined with replaceable wear plate material
- Full load of steel shot abrasive media included
- Large air intake for cooler operation and more efficient dust collection
- Hardened expanded metal basket
- Fork lift moving support built into the frame
- All components are UL and CSA listed
- Door safety switch
- Shot load indicating ammeter
- Cycle timer 0-30 minutes
- Paint: Sherwin Williams enamel
- Dust collector with double lined fire resistant bag
- Manual shake out

Model: MB2000

AIRLESS BLASTER

Clean Parts Fast With LS Industries Airless Shot Blaster. The MB2000 is small, compact and powerful. It quickly cleans parts to a bright metal finish and cuts cleaning costs dramatically. Parts are loaded into the blaster basket, the door is closed and the cleaning cycle timer is set to the desired time. After the cleaning cycle is complete, clean parts are removed from the basket and another load of dirty parts is placed in the basket. A typical load of electrical parts consists of 6 starter cases or 12 alternator end frames. The blaster can clean a wide variety of parts and is not limited to cleaning electrical parts.

Specifications:

Dimensions:	36"W x 38"D x 96"H
Impellar Motor:	2 Hp
Basket Motor:	1/3 Hp
Dust Collector Motor:	1/2 Hp
Electrical Requirement:	1ph, 220 Volts, NEMA 12
Basket Capacity:	2 cu. ft. with dimensions of 17.5"L x 15"D
